

Assembling Your Technotrash Can™

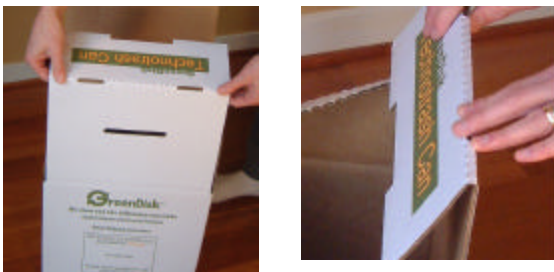

GreenDisk now offers two sizes of Technotrash Cans. You can use the same set of instructions to assemble either one. To begin, we will start with the bottom of your Technotrash Can.

Step 1. Turn the Technotrash Can upside down. Fold back the largest flap. Then fold over each of the side flaps and tuck them under the first flap.

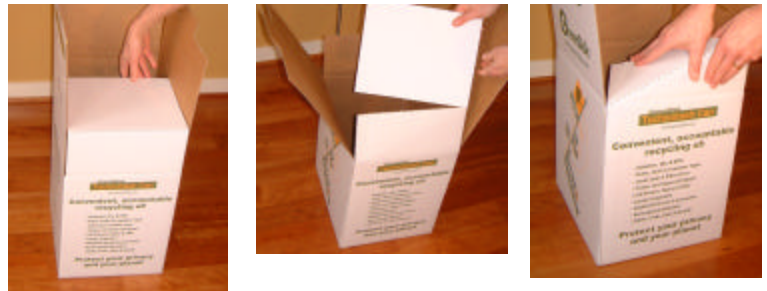

Step 2. To close the bottom, fold the remaining flap forward. Then also tuck it under the first flap, covering the side flaps which will secure the bottom of the box.

Step 4. Fold the flap that says “Technotrash Can” along the double perforation as shown above. Note the hole/slot in this flap. You’ll need it for Step 5.

For more assembly details or for instructions on returning your Technotrash Can go to www.greendisk.com or call 800-305-3475

Your GreenDisk Technotrash Cans
(as they should look when completed)

Step 3. Turn the box right side up. Select one of the side flaps (without writing). Fold and tear off along the top perforation. Bend flap along the diagonal seam. Turn the box 180° and repeat. Place the two detached pieces in the box to reinforce the bottom.

Step 5. Fold the remaining flap back so its tab fits into the open slot on the back flap from Step 4. For a tight fit, bend down the tab extension and tape it to the back of the box. Lastly, push in the perforated HERE opening. For greater stability, tape the side flaps to the top. You are ready to recycle !
